

Pregis

Protective Packaging Solutions

ASTRO-BUBBLE® GREEN VALUE PROPOSITION

Astro-Bubble Green uses up to 40% recycled content with up to 20% from post-consumer sources to provide high-quality, durable protective air cushioning for surface cover, packing fragile items, and void-fill. Astro-Bubble Green air cushioning bubble is designed to incorporate high levels of post consumer recycled content without losing product integrity, which provides the value our customers expect and moves us closer toward Pregis' own sustainability goal to use resources wisely.

Environmentally responsible practices are an important part of Pregis' philosophy. By creating a use for post-consumer resins, Pregis helps plastics recycling efforts and reduces our dependence on virgin materials. Recycling larger amounts of post-consumer waste is a crucial step in achieving greater sustainability for plastic protective packaging.

PROTECTING BEYOND THE BOX: THINK PREGIS

Astro-Bubble Green air cushioning bubble helps address the growing need for more sustainable packaging options. The distinctive light green color is transparent for easy product identification, and serves as a symbol of our "green" product.

Features and Benefits	Results
Up to 40% recycled content; Up to 20% from post-consumer sources	Reduces landfill waste
Easy to identify light green color	Promotes purchases of recycled content products
Manufactured using reusable polyethylene resin	Recyclable*
Superior cushioning	Optimal surface protection

*Air cushioning is not accepted in all recycling programs; please consult your local recycler.

HIGH QUALITY, HIGH VALUE SOLUTIONS

Pregis' Astro-Bubble Green air cushioning materials offer a smart, lightweight, clean and flexible alternative to loose-fill, product wrap or void-fill.

Distributor	End-User	Environment
Expanded offering that includes innovative sustainable packaging products	Protective packaging that addresses environmental concerns of the end consumers	Use of sustainable packaging lessens depletion and dependence in petroleum based resins
Air cushioning material that offers an environmentally-conscious alternative to loose-fill	More cost-effective to ship, store and use	Light weight material uses less fuel for transport and less carbon emissions into the atmosphere
Cost-effective sustainable packaging with versatile end-market applications	Protective packaging made with recycled materials with no loss in performance	Increased preservation of virgin raw materials

Think Sustainability. Think Pregis.™

USE ASTRO-BUBBLE GREEN FOR ALL YOUR CUSHIONING, SURFACE PROTECTION, AND VOID-FILL NEEDS.

Pregis understands that today, more than ever, companies are in need of cost-effective, strong and reliable protective packaging products that minimize damage to a wide variety of goods during transit. Astro-Bubble Green air cushioned bubble is available in rolls of small, medium and large bubble in a range of widths and lengths to provide to you the best protective air cushioning available, whatever your needs.
