

NEW!

FOAMplus® Mini System Fast, versatile, foam-in-a-bag system

FOAMplus® Mini System is a complete stand alone work station that dispenses foam into a bag. It requires very little space and can be operated on a table in your Shipping Department. With the simple touch of a button, using five different preset volume settings, Operators can quickly create a variety of foam filled bags to support the packaging needs in shipping rooms, multiple pack stations, and even the production department.

Storopack - Perfect Protective Packaging

Your product deserves nothing but the very best protective packaging.

What is needed these days to be successful? Good products, unconditional customer orientation and the will to improve every day. Storopack has been operating successfully in the market for more than 50 years and is today the leading system supplier and service provider worldwide in the areas of flexible and customized protective packaging.

The Packaging Division offers flexible protective packaging systems encompassing air cushions (AIRplus®), paper pads (PAPERplus®), PU-foam-in-place packaging systems (FOAMplus®), and Loose Fill (PELASPAN® and PELASPAN® BIO) packaging materials. It supplies demand-driven equipment solutions covering everything from single workstations through to the design and implementation of packaging lines integrated into a company's intralogistics and equipped with manual, semi- and fully automated infeed packaging systems. Specialized application engineers of Storopack ensure that the entire work flow takes place in keeping with economic and ergonomic principles (working comfort) in order to constantly improve the customers' protective packaging process. The Packaging Division is represented by locations in North America, Europe and Asia. The products are available through Storopack subsidiaries worldwide.

- Predetermined volume settings
- Two moving parts
- No Chemical Drum Changeover or Disposal
- Small footprint
- 110v Power
- No Solvent
- Light Weight
- Service Contract optional

Benefits:

- Superior Protection
- Minimal Start-up Cost
- Easy to Use
- Minimal Downtime
- Minimal Space Requirements
- Flexibility of Locations
- Improved Environmental Position
- Easily Transportable
- Transparent Cost/pack

Superior product protection for all your packaging applications.

FOAMplus® Mini System molding process

FOAMplus® Mini System makes it easy to produce your own custom packaging on-demand. The molding systems are easy to use and can produce up to 13 cushions per minute. As they are formed, the FOAMplus® Mini System cushions can simply be placed directly into the packaging carton around the product and the package is ready to go. On-demand custom packaging molds save valuable time and costly storage space.
