

CENTERLOAD

# THE GORILLA BAG

## FEATURES :

- High Strength Polyethylene Liner and Woven Polypropylene outer shell
- Patented Turbo Flow valve is a standard feature on all bags. Bags fill four times faster than most other bags on the market.
- Verified by the Association of American Railroads for applicable applications
- Moisture resistant
- High burst pressure

## TURBO INFLATION SYSTEM

*The only patented gauged turbo inflation tool on the market.*

Inflates any size and type of bag four times faster and still allows you to gauge the pressure accurately.

Metal Turbo Flow inflator available for use on lightweight and level 1 bags. No gauging required and the bag can not be over inflated.

## SIZES:

We offer a variety of stocked sizes in both 36" and 48" widths.

## "THE NEXT GENERATION OF DUNNAGE AIR BAGS"

Easy to use on single or double stacks

Vertical or horizontal application

## BENEFITS

- Offers tremendous load force
- Expands and contracts with changes in temperature and altitude
- Inexpensive Insurance
- Durable
- Recyclable
- Reusable
- Rigid
- Moisture resistant
- Expands to fill large voids
- Low cost air inflators available
- Gauged inflators available
- Our bags are subject to the toughest quality tests to ensure maximum performance
